

Partnership CPD journey for secondary schools

As part of an Ogden partnership, teachers have access to CPD from EYFS to KS5, as well as opportunities for further professional development as part of the Teacher Network. This document outlines the CPD provision for secondary school teachers.

Year 1 can access:

Partnership lead induction day:

CPD, support and practical advice to help establish your partnership, develop a sustainable model for the future and build links with other teachers in the Ogden partnership network

KS3 Physics:

workshops and resources for non-specialist science teachers delivered in twilight sessions, over a full day or with a blended learning approach – each topic includes a physics input, collaborative planning, time for reflection, and resource

Forces

Waves

Electricity

Partnerships can also access:

Annual partnership conference:

networking and CPD for partnership co-ordinators

Developing Physics Specialism:

individual mentoring for early career teachers in their third to fifth year teaching physics for GCSE or A-level

Teacher Network:

opportunities for further professional development

Teaching Core Physics:

half-termly physics coaching and mentoring sessions for early career teachers in their first or second year of teaching

Session 1:
Earth & Space

Session 4:
Forces

Session 2:
Light

Session 5:
Energy

Session 3:
Sound

Session 6:
Electricity

Subject Knowledge for Physics Teaching:

eight weeks, free blended learning CPD for KS3 and KS4 teachers without a physics specialism, the course will help to develop teaching skills, confidence and pedagogy, and will consider mathematical problem solving, conceptual challenges and practical work
