

TEACH PHYSICS 2024

The Teach Physics internship programme provides 4-5 week placements in school science departments. Students gain an intensive experience of teaching physics and broader school life, and schools gain insight and enthusiasm from current undergraduates.

The Ogden Trust is looking for schools in England to host interns in Summer 2024

Benefits for schools include access to:

- keen, committed ambassadors for physics and higher education
- undergraduate role models
- youthful enthusiasm
- an extra pair of hands at a typically hectic time of year!

The programme is supported by the Trust to minimise the workload for the schools.

The school's responsibilities will include:

- hosting one or two interns for 4-5 weeks at the end of the summer term
- conducting an interview and having the final say on whether to accept the interns
- applying for DBS clearance for the interns
- providing a mentor and a clear timetable for the interns

"We have taken part in the Ogden internship scheme for many years. Our interns this year were fantastic and have returned to university education for now. One of our interns from two years ago has now completed teacher training – they did their teaching placement with us and have now been employed by our school as a full-time physics teacher. As a cherry on this already fantastic cake, the other intern from that year has also taken a job teaching physics in another state school. With very good reason we will be very happy to keep hosting interns!

For more information, please visit our website:
ogdentrust.com/teacher-support/teach-physics/

If your school is interested in hosting Teach Physics interns, please send an email to: teachphysics@ogdentrust.com expressing your interest and how many interns you would be able to host. We will be in touch with further details.

Deadline for schools to confirm participation in the Teach Physics internship programme is Monday 26 Feb 2024

The Ogden Trust will:

- recruit and put forward interns to schools
- share relevant information about the applicants with the schools
- support the interns with an educational grant (£300 per week)
- reimburse the school the costs of the DBS clearance(s)
- grant the science department £100 per intern

The interns will:

- observe and assist with all aspects of teaching
- plan and deliver their own lessons
- give a presentation/lead a workshop on applying to university
- run/assist with extra-curricular clubs and activities
- work with pupils with SEN and/or on the G&T register

Important dates for your diary

| | |
|----------------------------------|--|
| Monday 26 Feb | Closing date for confirming participation |
| By 4 March | Schools notified of intern allocation |
| From 11 March | Schools conduct interviews |
| From 18 March | Schools invite interns for induction, with identification for DBS clearance (13 weeks ahead of probable start date of 17 June) |
| Week of 22 April | Final opportunity for induction with DBS documents (8 weeks ahead of probable start date of 17 June) |
| April/May/June | Schools plan timetable for interns and communicate directly with them |
| Last month of school year | Interns in schools |
