

# TEACH PHYSICS 2024

The Teach Physics internship programme provides 4-5 week placements in school science departments. Students gain an intensive experience of teaching physics and broader school life, as well as developing transferable skills for other careers.

## Benefits for interns include:

- an intensive experience, both of teaching physics, and of broader school life
- support from experienced mentors as well as the Trust
- improved understanding of different presentation styles, through observations and involvement in lessons as well as extra-curricular activities
- augmented reflective practice through writing a report
- opportunities to develop resources and build strong communication skills
- increased confidence and knowledge
- a £300 weekly education grant for the duration of the placement

## You will:

- observe and assist with all aspects of teaching
- plan and deliver your own lessons
- give a presentation/lead a workshop on applying to university
- run/assist with extra-curricular clubs and activities
- work with pupils with SEN and/or on the G&T register
- submit a reflective report

"I am really happy that I applied for this internship. Being able to help students understand physics, explaining to them why I am so passionate about this subject, and encouraging them to enjoy physics was a great opportunity for me to realise that this was something I wanted to pursue in my life. Not only did this internship help me make a better decision about my future, but it also helped me become a more confident person. I loved sharing my knowledge with students and conducting university workshops where I had the chance to inspire students to pursue their future goals."

Teach Physics intern 2023

## How to apply:

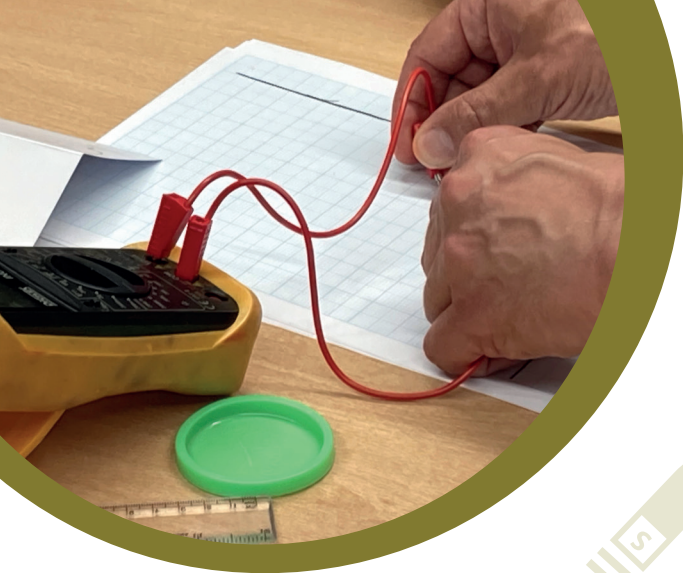

Even if you have not previously considered teaching as a career, but think that you could light up a classroom and enthuse youngsters with your passion for physics, find out more and apply for an Ogden Trust Teach Physics Internship via our website: [www.ogdentrust.com/teacher-support/teach-physics](http://www.ogdentrust.com/teacher-support/teach-physics)

**Applications will open on the website in December 2023**

**Deadline for applications is midnight Friday 26 January 2024**

Note that there are a limited number of placements in certain areas of the country and we may not be able to match you to a school in your preferred locations.

### The Ogden Trust will:

- manage the recruitment process with the schools
- support you with an educational grant (£300 per week)

### The school will:

- conduct an interview with you
- host an induction day prior to the start of your placement
- apply for DBS clearance for you
- provide a mentor and a clear timetable for you

### Important dates for your diary

**Friday 26 January**

**From 4 March**

**From 11 March**

**From 25 March**

**April/May/June**

**Last month of  
school year**

Closing date for applications

Interns notified of school allocation

Schools conduct interviews

Schools invite interns for induction,  
with identification for DBS clearance (13 weeks  
ahead of probable start date of 17 June)

Schools plan timetable for interns and  
communicate directly with them
